THURSDAY, JUNE 9, 2022

12:00 - 1:00 P.M. EASTERN TIME

SPEAKERS:

Sphoorti Patil, Product Leader for Spatial Transformation and Azure Digital Twin and IOT platform for Smart Buildings & Workplace Solutions - Microsoft

Sphoorti Patil is currently leading Product Strategy for Spatial Transformation, Workplace Strategy, and building employee experiences to support employee productivity and Hybrid workplace strategy. She has enabled the digital transformation of the Global Workplace Strategy in Microsoft by helping the business translate physical as-built assets to the digital workplace using Azure Digital Twin, Azure IoT Platform, and Azure Maps. Sphoorti comes with a wide range of technical expertise and a customer-centric mindset. She has worked previously in Best Buy, Amazon Web Services (AWS), and Intel in various capacities in Product development and cloud-based distributed system design for over 15 years.

Theresa Cheng, Director| Facilities Planning and Design| Business Relations - CBC/RADIO-CANADA

Since obtaining her bachelor's degree in architecture, Theresa has accumulated more than 20 years of experience in architecture, design, work environment strategy and project management. She currently leads corporate facilities planning, work environment strategy and space design at CBC/Radio-Canada. Her approach is based on a workspace design process centered on users and their well-being, aiming to improve their engagement and experience to create inspiring and creative spaces.
